

KANURI JAGAN SATYA SAI

Amalapuram, Andhra Pradesh | +91-8688295885 | jagansatyasaikanuri@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Result-driven Java Full Stack Developer and Software Engineer with extensive hands-on experience designing, developing, and deploying scalable, secure full-stack applications. Proficient in building robust backend architectures using Java, Spring Boot, Microservices, and REST APIs, paired with responsive React.js frontends. Adept at optimizing database performance with MySQL. Demonstrated expertise in implementing secure JWT authentication, role-based authorization, workflow automation, and containerized deployment via Docker.

CORE SKILLS

- **Languages & Core Concepts:** Java, SQL, JavaScript basics, HTML, CSS, OOP
 - **Backend Development:** Spring Boot, REST APIs, Spring Security, Spring Data JPA, Spring MVC, JDBC
 - **Frontend Development:** Responsive UI Design, API Integration
 - **Databases & Caching:** MySQL, Redis (Caching), Pinecone (Vector Database)
 - **AI & Specialized Integrations:** LangChain4j (RAG), Whisper API, Workflow Automation, JWT Authentication
-

PROJECTS

Service Request Workflow Automation System

Technologies used: Java, Spring Boot, Spring Security, MySQL, REST APIs, HTML, CSS, JavaScript, Git, Render

- **Architected and developed** a secure, distributed workflow automation system using Spring Boot, improving process efficiency across defined service boundaries.
 - **Implemented Spring Security** to enforce robust role-based authentication and authorization controls, safeguarding sensitive operations and user data access.
 - **Engineered data layers** utilizing JDBC and Spring Data JPA with MySQL.
 - **Validated and documented** 100% of RESTful API interfaces using Postman and Swagger, accelerating frontend-to-backend integration.
 - **Deployed live application** on Render container platforms using clean, well-documented code engineered via Agile sprint cycles.
 - **Live Link:** <https://service-request-workflow-system-1.onrender.com>
-

AI-Powered Knowledge Assistant

Technologies used: Java, Spring Boot, React.js, REST APIs, MySQL, Redis, Pinecone, LangChain4j, Whisper API, JWT, Docker

- **Built a full-stack application** featuring a highly responsive React.js user interface seamlessly integrated with a Spring Boot backend via REST APIs.
 - **Optimized query latency** by integrating Redis caching mechanisms and a Pinecone vector database for high-performance RetrievalAugmented Generation (RAG).
 - **Integrated LangChain4j and Whisper API** to process real-time AI interactions and multimedia audio transcriptions directly within the platform.
 - **Secured end-to-end communication** using JWT authentication, protecting stateless user sessions and RESTful endpoint architectures.
-

EDUCATION

- **B.Tech in Artificial Intelligence & Machine Learning** | Bonam Venkata Chalamayya Engineering College | 2023 – 2026 | **CGPA: 7.79**
 - **Diploma in Computer Science** | BVC Institute of Technology and Science | 2020 – 2023 | **Percentage: 76%**
 - **SSC (10th Class)** | Zpp High School Cheyyeru | **Percentage: 89%**
-

CERTIFICATIONS & ADDITIONAL INFORMATION

- **Java Certification** – Nies Academy, Hyderabad (Core Java, Advanced Java, JDBC, Servlets)
