

KANURI JAGAN SATYA SAI

Amalapuram, Andhra Pradesh | +91-8688295885 | jagansatyaikanuri@gmail.com

PROFESSIONAL SUMMARY

Hands-on Java Developer and AI & ML Engineering graduate with strong core Java and advanced Java skills including JDBC, Servlets, and Web Services. Self-project experience in designing, coding, unit testing, and supporting distributed applications using Spring Boot and Microservices. Proficient in SQL, MySQL, and RESTful Web Services. Trained professional seeking a Java Developer role to contribute to production-grade distributed application development.

TECHNICAL SKILLS

Core Java: OOP, Multithreading, Collections Framework, Exception Handling, JDBC, Servlets

Advanced Java: JDBC (database connectivity), Servlets (web layer), Web Services (REST/SOAP basics)

Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Microservices Architecture

Distributed Applications: Microservices Design, RESTful Web Services, API Design & Integration

Databases & SQL: MySQL, MariaDB, SQL, JDBC-based DB connectivity, CRUD Operations

Web (Basic): HTML, CSS, JavaScript, Servlet-based web layer

Unit Testing: API Testing with Postman/Bruno, Manual Test Case Design

SELF PROJECTS

Service Request Workflow Automation System

Java | JDBC | Spring Boot | Spring MVC | Microservices | RESTful Web Services | MySQL | SQL

- Designed and developed a **distributed application** using **Spring Boot** and **Microservices** architecture for end-to-end service request workflow — creation, approval, escalation, and closure.
- Implemented **JDBC**-backed data access alongside Spring Data JPA for persistent **MySQL/SQL** storage and optimized query execution.
- Built **RESTful Web Services** (REST APIs) following web services best practices for inter-module communication in a distributed setup.
- Applied **core Java** multithreading and Collections Framework for concurrent request processing and in-memory data management.
- Implemented role-based access using **Spring Security** for Users, Approvers, and Admins — active participation in designing, coding, and supporting the application.

Aadhaar Application Management System

Java | JDBC | Spring Boot | Spring Data JPA | RESTful Web Services | SQL | MySQL

- Built a complete **Java** backend application with **JDBC** and Spring Data JPA for reliable **SQL/MySQL** data persistence and retrieval.
- Developed production-ready **RESTful Web Services** with full CRUD operations — hands-on coding experience from design through deployment.
- Applied OOP principles, dependency injection, and **core Java** best practices ensuring maintainable, modular code.

EDUCATION

B.Tech – Artificial Intelligence & Machine Learning

Bonam Venkata Chalamayya Engineering College | 2023 – 2026 | CGPA: 7.35

Diploma – Computer Science

BVC Institute of Technology and Science | 2020 – 2023 | Percentage: 76%

CERTIFICATIONS & TRAINING

- Java Certification** – Nies Academy, Hyderabad (Core Java, Advanced Java, JDBC, Servlets)
- Full Stack Development** – SmartBridge Educational Services (Web, Backend, Frameworks)
